

MARGARIDA FABRICA

fashioned crockery, and loves anything and everything to do with tableware, such as her soup plates, napkin rings and butter dishes. Her inspiration grows mainly out of her training in Amsterdam and Denmark, which has given her an acute feel for minimalism, functionality (objects exist first and foremost for their function), the play of light on materials and a tangible connection with flora and fauna.

Sometimes she decorates her pieces with a delicate sprig of lavender or a stylized swallow. Her ceramics are also available from **A LOJA** and **FABRICA FEATURES LISBOA**.
